

IN THE SPECIFICATION

After paragraph [0109], insert paragraph [109.1]

[0109.1] As shown in Fig. 1b mesh 14 may have its ends disposed in groove 13 of base plate 10. Base plate 30 is shown having a similar groove. Thus once the coating 15 is applied to the flexible mesh as discussed previously in and around the mesh, the coating helps to hold the mesh within the groove 13 of the base plate 10.
